February 1, 2021

1 Introduction

The task is to annotate emotion role labels of the given instances.

2 Guidelines

Please consider the following guidelines for annotating emotion labels:

1. First annotate what emotion is present in the text (only one, no intensity) with regard to Plutchik's 8 basic emotions:

   - joy
   - trust
   - fear
   - surprise
   - sadness
   - disust
   - anger
   - anticipation

2. Then annotate the following roles:

   - experiencer: the entity experiencing/expressing the emotion (eg. *my dad*)
   - cue: word(s) that signal the emotion (eg *infuriated*)
   - target: entity/event toward which the emotion is targeted (eg. *the chef*)
   - stimulus: entity/event that caused the emotion (eg. *the awful food*)

   Each instance should only receive one of each roles at maximum. Roles may be left out if not present.
